ABOUT U.S. TAPE COMPANY

Founded by surveyor Justus Roe in 1876, U.S. Tape has innovated, designed and manufactured tape measures for over 140 years. Many of the printing press and product designs he developed and influenced are still industry benchmarks today.

U.S. Tape Company remains focused on the measurement tools at our core and, while expanding globally, we continue to proudly manufacture Spencer logging tapes, US Tape Oil gauge tapes, ProTape bench tapes, long tapes and selected short tape measures in our facility in Pennsburg, PA.

As a tape measure supplier to the U.S. Government Supply Administration (GSA), our products are built for accuracy and durability. Our oil gauging tapes exceed the standards set by the American Society of Testing and Materials (ASTM) and the American Petroleum Institute (API).

Following in the footsteps of Justus and his never-ending desire to improve on the status quo - US Tape has concentrated on adding products to our portfolio that help industrial and residential companies meet the shifting demands of today's construction, maintenance and manufacturing markets. We are proud to offer Stringliner brand mason's twine with its patented handle and world class strength, Durawheel measuring wheels with best in class durability backed by a lifetime counter warranty, DuraMark chalk reels and marking chalk, Rhino fiberglass folding rulers, Striker dead blow hammers and most recently Occidental professional leather tool pouches made to order in our Santa Rosa, California facility.

A lot has changed since the US Tape Company was founded in 1876 but our dedication and passion around our customers and providing world class tools for professional users remains at the core of everything we do.

At U.S. Tape Company we understand that our lasting success starts and ends with our customer.

Please feel free to e-mail us at info@ustape.com or call us at 215-541-1850 with any questions you may have. We look forward to working with you.

DW-500 6" diameter wheel

Normally used for shorter distances and smoother surfaces.

- Tri-fold handle

- Measures to 9,999 feet
- Pistol grip handle
- Balanced in-line design
- Sealed roller bearings
- Belt driven counter for long life and smooth operation
- 25% Larger counter numbers than previous models
- Hi-traction tire
- Folds for easy carrying and storage

DW-1000 12.5" diameter wheel

Ideal for long distances over rough surfaces.

- Strong oval tube design
- Wide stance folding kick stand
- Heavy duty chassis
- Debris scraper

TAKE A CLOSER LOOK AT THE DW-PRO & DIGI-PRO

Don't be fooled by Cheap Imitations

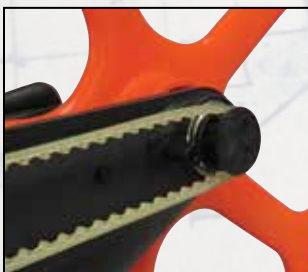

DuraWheel is the only Pro Grade Measuring Wheel that features:

Ultra-Durable Oval Shaft

Larger - Easy to Read Display

Belt-Driven Accuracy

Sealed Roller Bearings

Long Lasting
High Traction Tire

DW-PRO

Has all the features of the DW-1000 and more:

- Trigger operated brake
- Grip mounted counter-reset control along with reset button near counter

DIGI-PRO

- Converts measurements to:
 - Feet
 - Feet/Inches
 - Feet/Tenths
 - Meters
 - Meters/Centimeters
 - Meters/Decimeters
 - Yards
 - Yards/Inches
- Reset button on counter can scroll through units of measure
- Trigger operated brake
- Comes complete with carrying case (Uses 2 AA batteries, not included)

- Folds for Easy Carry & Storage
- Comfortable Handle

MEASURING WHEELS

DuraMark offers a full spectrum line of premium chalk colors as well as a variety of permanence rated options to fit your marking needs. We have modified our chalk formulas and sourced the best pigments to make sure that the lines you strike stay where you put them, for as long as you want them to stay.

- Premium chalk in brilliant colors
- Formulated to give you a precise, strong, lasting line
- All bottles feature easy pour spouts
- Standard colors for every job including highly visible fluorescent orange and green
- Permanent chalk available in blue, red, and black

Made in France

MagnumPro

- Compact design with comfort rubber grip handle
- Holds over 10 oz. of marking chalk
- Easy to open slide for simple fill
- Steel crank assembly; fast rewind
- 165' braided cotton string with large round ring for easy pull and set

Stopline Combo

- Comfort rubber grip handle
- Fast rewind
- 100' braided poly/cotton line
- Packaged with 8 oz. blue chalk

Lil' Magnum

- Compact design holds 7 oz. of chalk
- Steel crank assembly; fast rewind
- 100' braided cotton line with large round ring for easy pull and set

Aluminum or Plastic Case Fast Rewind Reels

- 3:1 gear ratio
- Rubber plug for easy fill
- 100' line

Simple Accurate Fast

Simplify common jobs such as layout (for floors, tile framing, and cabinets), hanging pictures, installing drawer pulls, or any job that requires dividing a measured distance.

Mark the exact center of your work every time and avoid costly mistakes.

Use this one simple tool for all your measuring needs.

Take your measurement using the top edge scale

Find that same number on the bottom edge scale.

This is the center!

- Patented Center-Finding scale on bottom edge
- All standard English markings on top edge
- Chrome/Red ABS plastic case
- Compact case design and slide lock

CENTERPOINT® CENTER-FINDING TAPE

Item #	Description	Blade Color	Print Scale	Lock	Endhook	Inner Pack	Master Pack

SPECIALTY

- Soft face prevents marring of the work surface and reduces noise
- Sand-loaded head adds weight for:
 - Controlled impact
 - Minimized rebound
 - Low vibration
- Controlled swing allows for less fatigue with use
- Textured grip handle makes hammer easy to hold
- Common uses include woodworking, flooring, auto repair
- * Avoid using on nails or other sharp objects

MASON LINE

TWISTED vs. BRAIDED MASON LINE

Stringliner mason's twine comes in two varieties: Twisted or Braided. Both options are durable and will resist mildew. The one you choose depends on the project, environment, and cost considerations.

TWISTED

- Less expensive
- About 8% more line per roll than braided
- Useful for layout, masonry, general marking tasks

BRAIDED

- Won't unravel as easily when cut or reused
- More resistant to abrasion
- Doesn't spin as much when used with a plumb bob

BONDED BRAIDED MASON LINE

Stringliner offers an even more durable option of mason's line: *Bonded Braided*.

Bonding is a process that coats the string to make it more resistant to wear, UV rays, and water.

We offer Bonded mason's line in #18 Nylon, and even thicker #27 Nylon.

ALL Stringliner Black/White and Black/Mixed Color options are Bonded.

MASON LINE

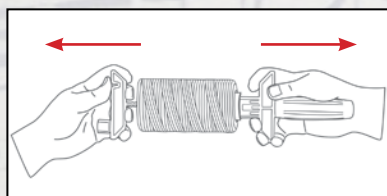

Some additional benefits of Bonded line are:

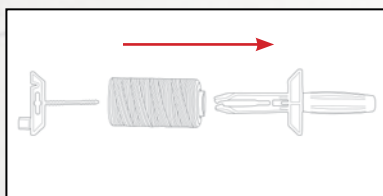

- The line is thicker and stiffer than unbonded nylon line
- The ends of the line won't fray or unravel as much when cut
- Bonded line is easier to knot than regular twine

HOW TO REFILL PRO & LEVEL WIZ HANDLES

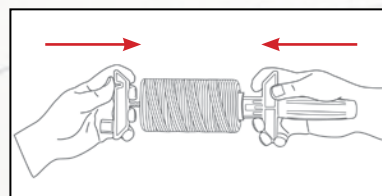

The patented handles of the PRO and Level Wiz reels are simple to reload and they will hold 1" line cores from 4" - 6" long.

1. Grasp the top and bottom "shoulders" of the reel handle and pull apart.

2. Slide a new roll of mason's line onto the spindle.

3. Firmly push the two pieces of the handle back together.

STRINGLINER MASON LINE REFILLS

- **Quality #18 Nylon Line** (tensile strength 165 lbs.)
- **Bright solid or mixed colors**
- **Twisted or Braided**
- **#27 Nylon Line** (tensile strength 216 lbs.)
- **Cotton line also available**
- * **Black/White, Black/Mixed Color, and #27 lines are Bonded** (coated for added durability, UV, water, and wear resistance)

• Set a level course for walls/corners

Ground Stakes

MASONRY ACCESSORIES

Item #	Description	Item #	Description
25940	Line Bone (2 pack)	19941CD	11" Ground Stake (24 ct. case display)
25943	4" Wood Line Block (2 pack)	19946CD	16" Ground Stake (12 ct. case display)

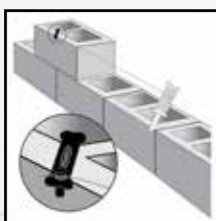

HOW TO USE THE LINE BONE

Follow these easy steps for using the unique *Line Bone* to help set a level course of hollow block masonry. You can see a short demonstration video on our website:
www.ustape.com

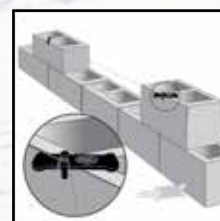

1. Attach the end of the string securely to the knob on top of the Line Bone.

2. Position one Line Bone at your starting block, as shown. Bring your line down to your ending block.

3. Position the second Line Bone as shown and secure your line to the knob on top of the Bone.

STRINGLINER ORIGINAL REELS

- Line reel handle made of durable polyethylene
- Quality #18 Twisted or Braided nylon line
- Large selection of colors
- Line secures in convenient notch
- * **Black/White line is Bonded**
(coated for added durability, UV, water, and wear resistance)

Wide variety of Gauging Tapes:

- Plated, Double Duty, and Derrick Tapes (Made in USA)
- Black Etched and Etched Stainless

Meets or exceeds American Petroleum Institute (API) Standard 2545 and American Society for Testing and Materials (ASTM) Standard D1085

NIST Certification available

Oil Gauge Frames:

- Strong and durable
- Corrosion resistant
- Safety yellow handle with grounding wire (oil gauge)
- Longer crank arm to speed retraction

(Plated and Double Duty 75' and shorter complete tapes are housed in small frame.

All Black Etched and Stainless complete tapes are housed in small frame.)

Blades:

- New coating on blades helps reduce the wear caused by harsh chemicals
- Variety of blade materials, graduations, and lengths
- Refill blades are compatible with competitors frames
- 3 rivet end assembly for dependability and durability

HOW TO CHANGE THE BLADE ON AN OIL GAUGE TAPE

Our refill blades are wound in the opposite direction than our competitor's blades, allowing for a quick changeout!

1. Turn the crank handle counter-clockwise and remove it from the frame.

2. Slide out the center hub holding the old tape blade and remove the tape blade from the hub.

3. Slide the new refill blade into the hub and insert the whole unit back into the frame. Put the crank handle back into the frame, turning it clockwise until snug.

4. Remove the adhesive tape from the refill blade, and the gauging tape is now ready to use.

PLATED for Dark Liquids; Corrosion Resistant; Made in USA
