

EASY TO USE

Unlike traditional sandbags, AquaSafe Flood Bags are lightweight, easy to activate and ready to deploy by just about anyone.

LIGHTWEIGHT

TRADITIONAL SANDBAGS

Various weights and sizes make them hard to stack and allow seepage.

Only **60** filled sandbags can fit on a pallet.

Leaky sandbags create a lot of mud and makes clean up last days.

AQUASAFE FLOOD BAGS

Uniform in size and shape allowing for superior stack-ability and a powerful flood barrier.

700 pre-activated AquaSafe flood bags fit on a pallet.

No muddy mess to deal with. Simply, dispose of the used bags in a trash receptacle.
