Volterrex's LED lighting products are designed for Commercial and Industrial Construction Companies and Tradespeople that need highly effective worksite lighting. Our rugged, premium products provide a safer and more productive worksite.

We do this by utilizing proprietary technology to provide comfortable and clean glare-free light you can actually work around without the blinding intensity of most LED and Halogen work lights currently on the market. Additionally, the Volterrex lights bring surfaces into sharp focus, illuminate details and reveal flaws helping to deliver better results.

Visit Volterrex.com or contact your Volterrex account manager to find out how to purchase Volterrex lights and improve your worksite safety and productivity.
