

ComStar has the
lowest GWP,
non-flammable retrofit
refrigerant replacements.

What is **GWP**?

Global warming potential or GWP is a measure of how much of a particular gas contributes to global warming compared to another gas over any chosen time period of 20, 100, or 500 years. It allows the comparison of how much warmth a given gas retains in the climate, compared to carbon dioxide (CO₂), which has a GWP of 1.

RS-51 - Grainger SKU 857FK1
RS-53 - Grainger SKU 857FK2
RS-44b - Grainger SKU 857FK0

As of 1/1/25 the state of CA banned all HFC refrigerants that exceed the GWP of 2,200.

ComStar offers Super-Low GWP alternatives to replace those affected by the ban.
