

HEAVY-DUTY INDUSTRIAL SAFETY STRIKING & DIGGING TOOLS

EXTREME POWER DRIVE™ DEAD BLOW HAMMERS

- Shot loaded composite interior dampens striking force to reduce user fatigue
- Cast urethane face to protect hammer when striking sharp metal surfaces
- Super Grip handle is the safest in the industry, integrated ergonomic style

STANDARD POWER DRIVE™ DEAD BLOW HAMMERS

- One piece molded non-marring face protects surface being struck
- Shot loaded composite interior dampens striking force to reduce user fatigue
- Free flowing inner shot concentrates striking power and increases driving force

ERGO POWER™ SOFT SAFETY STEEL SLEDGE HAMMERS

- Softer steel reduces the risk of head “shearing” when you strike anything harder than the hammer face
- Softer Rockwell Hardness of 35RH is close to softness of brass resulting in head mushrooming and not shearing
- Heads are “BLUE” and marked with an “S” for safety and quick identification on job-site
- Very popular in the Mining industry

CERTIFIED NON-CONDUCTIVE DIGGING TOOLS

- All Non-Conductive Digging Tools undergo 100% testing at 10,000 volts to meet/exceed IEC 60900 and ASTM F1505 standards
- Certified Non-Conductive properties combined with Nuplaglas™ and Power Pylon™ technologies provide safest/strongest tools available
- Power Pylon™ shovel blades – no shank means less breakage in the harshest applications
- Manufactured in safety orange for easy identification and electrical insulation
- Each tool carries a unique serial # permanently registered at the Nupla Corp. for traceability
