

We Know Water.

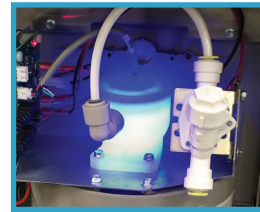

QUASAR™

UV-C LED WATER TREATMENT EXCLUSIVELY THROUGH OASIS

Introducing a new look to the industry, with the OASIS Stainless Steel alcove featuring QUASAR™ - the only model on the market that uses UV-C LEDs that disinfects and treats water at the point of dispense on bottle filling stations. A refreshed look to our VersaFiller™ bottle filler product line while keeping the same footprint of the traditional bottle fillers. OASIS can match any aesthetic while providing contactless access to drinking water where you need it.

QUASAR Features:

-  **Low Power:** UV-C LEDs do not transfer heat to the treated water or waste energy
-  **Constant Protection:** UV-C LEDs pulse on every 10 minutes to keep the dispense point sanitized
-  **Pathogen Inactivation:** Effective against a wide range of water-borne pathogens by 99.9%, including Legionella, Cryptosporidium, and Giardia
-  **Chemical Free:** Provides physical treatment of water without the use of harmful chemicals or altering taste
-  **Mercury Free:** Environmentally friendly, no special disposal required
-  **Long Life:** UV-C LEDs will last ten years or more

Upgrade your existing coolers to the ultimate in germ-free dispense with Oasis Retrofit Bottle Filler with Quasar.

DISINFECTION DETAILS

When water is dispensed and the UV-C is activated, the indicator LED glows blue and a message pops up on the LCD display: **“UVC DISINFECTION IN PROGRESS”**. Fail safe feature, LED light changes to orange if QUASAR fails and water stops dispensing.

MODERN, UNIQUE HYDRATION SOLUTION

Exclusive Tilt 'N Tether Feature From OASIS

ACCESSIBILITY

Easy access to filter with just two screws to open bottle filler

CONVENIENCE

One screwdriver needed - keeping it simple on your toolbox

EFFICIENT

Filter replacement and/or maintenance can be performed in under two minutes

QUASAR Filtration Options

- Filtered units include dual filtration with VersaFilter III and a Remedi filter
- VersaFilter III is Certified to NSF/ANSI 42 and 53 for lead, cyst, Particulate Class I, chlorine, taste and odor reduction to 4,750 gallons
- Remedi filter is based on nano-technology that captures contaminants including bacteria, cysts, viruses, colloidal and pharmaceuticals

While QUASAR UV-C treats at the point of dispense, having dual filtration provides an additional layer of microbe reduction at the bottle filler as well as the drinking fountain bubbler.

Ultimately providing the best quality drinking water.

OASIS Stainless Steel Bottle Fillers Feature:

- High durability stainless steel: Wrapper is 430 grade stainless steel; Alcove is 316 stainless steel.
- Intuitive, contactless operation reducing the spread of bacteria and germs.
- Built-in filter monitor and bottle counter.
- Oasis' exclusive Tilt 'N Tether for fast, easy filter changes.
- Upgrade your existing fountains to contactless bottle filling stations with Oasis retrofit bottle fillers.
