Around the Clock Video Monitoring & Verification

Feel at ease knowing your property is under vigilant watch and can receive help when needed. Our cameras integrate with central station monitoring software, making sure your property remains safe and secure at all times.

What is AVS-01?

AVS-01 is a standard designed to evaluate alarm severity via video verification, allowing first responders to prioritize emergencies more efficiently. Speco Technologies® provides a variety of products fully integrated with Immix® and CHeKT Visual Security, ensuring complete AVS-01 compliance.

immix

Immix® provides scalable video and event-based monitoring solutions for central stations and command centers. Its open platform unifies systems, enhances services, and creates recurring revenue. Immix® offers customizable modules for communication, dispatch, and AI, optimizing operations and boosting competitiveness.

CHeKT Visual Security integrates AI-powered video with alarm monitoring centers, offering real-time video control for enhanced security. It provides comprehensive protection for homes and businesses, boosting peace of mind.

Look for the Immix® and/or CHeKT logos to identify integrated products in the catalog.

All Roads Lead To Recurring Monthly Revenue

Enhance Your Video Surveillance

Advanced Analytics

Speco Technologies® provides an extensive range of cameras equipped with advanced analytic features to enhance your security experience. Our cutting-edge Advanced Analytics suite, featuring facial recognition, face detection, and license plate recognition, delivers powerful and precise solutions that improve both security and operational efficiency.

License Plate Recognition

Captures still images of license plates and uses machine learning to actually comprehend individual alphabetical and numerical characters seen on the plate.

Facial Recognition

Records and stores images that can be searched during playback. Receive real time alerts when there is a friendly or unfriendly face in view.

People & Vehicle Detection

When active, you can receive push notifications when your system has detected people or vehicle moving through your application. Our AI technology ignores false motion like animals, foliage and precipitation.

Multi-trigger Analytics

Stay ahead of potential threats with our advanced Multi-trigger Analytics in Speco's systems. Our cutting-edge technology allows for the simultaneous detection and analysis of multiple events, ensuring comprehensive and reliable surveillance.

Increase Your Brand Awareness

Take your brand to the next level with private labeling, and make a lasting impression by adding your company's logo to cameras or wall mount recorder doors. This simple yet effective customization boosts brand recognition, helping your business stand out and be remembered. It's more than just a logo—it's a statement of professionalism, showing your commitment to quality and excellence.

By branding your products, you create a deeper connection with your customers, fostering trust and loyalty while encouraging ongoing engagement.
